

OSD AUDIO RX540

Outdoor Rock Speaker

Product Description

Sold in pairs, the RX540 includes stereo speakers (left/right) disguised as rocks to blend into a variety of outdoor environments.

Key Features

Built with all-weather components, these speakers include a 5.25" polypropylene cone woofer, a 3/4" tweeter and power handling up to 80 Watts. These speakers require power and are typically connected to an amplifier or A/V receiver. The RX540 Rock Speaker pair can be placed anywhere that a natural rock would be found. Typical locations include barriers around pools, ponds and spas or bordering a garden and even as an accent in flower gardens.

- All-weather components withstand rain, high temperatures, and other harsh weather conditions
- Acoustically inert enclosure made from aerospace grade multi-layer composite cabinetry
- Designed specifically for outdoor environments with excellent sound quality
- Available Colors: Sandstone Brown & Granite Grey
