

ENHANCER 9

Area Pathlight
Centurions Series

PROJECT:	
TYPE:	
CATALOG #	
LAMP(S):	
NOTES:	

A perfect addition to any job. This Area Enhancement light is sure to deliver a 5-Star rating all around due to the robust light output of the large 9" Hat & the shear girth of the stems. These Fixtures are built with 1 1/4" stems and they look hefty. The round figure that this fixture takes on functions to direct water off and away, minimizing exposure to the LED and prevents any spotting. If there is an elevation change, for example, Stairs and you may be looking up under the Hat, in this case you put the supplied Industry fist Blinder, a small plastic cup that slips over the LED lamp and block out all glare. The ability to order a 36, 48 and 60 inch Stem allows for greater distance between the fixtures and the ability to place fixtures back away from the path or walkway thus not only being able to light the flower beds but also the fixture is not in harm's way. All of the 36, 48, 60 inch come with the Stout Stake the first stake to allow the stem to slip into the stake for a 1 1/2 before the threads. Simple put there is not stronger stake on the Market. PATENT PENDING.
